Notes for Operations Research

Lan Peng, PhD Student
University at Buffalo, SUNY
lanpeng@buffalo.edu

June 8, 2019

Contents

I Preliminary Topics **5**

1 Review of Linear Algebra **7**

2 Polyhedron Analysis **9**

II Linear Programming **11**

3 Introduction **13**

4 The Simplex Method **15**

5 Duality Theory and Sensitivity Analysis **17**

6 Other Algorithms for Linear Programming **19**

7 Exercises **21**

III Network Optimization **23**

8 Introduction **25**

9 Exercises **27**

IV Integer Programming **29**

10 Introduction **31**

11 Exercises **33**

V Dynamic Programming **35**

12 Introduction **37**

13 Exercises **39**

VI Convex Optimization **41**

14 Introduction **43**

15 Exercises **45**

VII Nonlinear Programming **47**

16 Introduction **49**

17 Exercises **51**

VIII Heuristics ans Metaheuristics **53**

18 Introduction **55**

19 Exercises **57**

IX Game Theory **59**

20 Introduction **61**

21 Exercises **63**

X Decision Analysis **65**

22 Introduction **67**

23 Exercises **69**

XI Markov Chains **71**

24 Introduction **73**

25 Exercises **75**

XII Queueing Theory **77**

26 Introduction **79**

27 Exercises **81**

XIII Inventory Theory **83**

28 Introduction **85**

29 Exercises **87**

XIV Reliability Theory **89**

30 Introduction **91**

31 Exercises **93**

XV Simulation **95**

32 Introduction **97**

33 Exercises **99**

Part I

Preliminary Topics

Chapter 1

Review of Linear Algebra

Chapter 2

Polyhedron Analysis

Part II

Linear Programming

Chapter 3

Introduction

Chapter 4

The Simplex Method

Chapter 5

Duality Theory and Sensitivity Analysis

Chapter 6

Other Algorithms for Linear Programming

Chapter 7

Exercises

Part III

Network Optimization

Chapter 8

Introduction

Chapter 9

Exercises

Part IV

Integer Programming

Chapter 10

Introduction

Chapter 11

Exercises

Part V

Dynamic Programming

Chapter 12

Introduction

Chapter 13

Exercises

Part VI

Convex Optimization

Chapter 14

Introduction

Chapter 15

Exercises

Part VII

Nonlinear Programming

Chapter 16

Introduction

Chapter 17

Exercises

Part VIII

Heuristics ans Metaheuristics

Chapter 18

Introduction

Chapter 19

Exercises

Part IX

Game Theory

Chapter 20

Introduction

Chapter 21

Exercises

Part X

Decision Analysis

Chapter 22

Introduction

Chapter 23

Exercises

Part XI

Markov Chains

Chapter 24

Introduction

Chapter 25

Exercises

Part XII

Queueing Theory

Chapter 26

Introduction

Chapter 27

Exercises

Part XIII

Inventory Theory

Chapter 28

Introduction

Chapter 29

Exercises

Part XIV

Reliability Theory

Chapter 30

Introduction

Chapter 31

Exercises

Part XV

Simulation

Chapter 32

Introduction

Chapter 33

Exercises
