

Notes for Operations Research

Lan Peng, PhD Student

Department of Industrial and Systems Engineering
University at Buffalo, SUNY
lanpeng@buffalo.edu

June 8, 2019

Contents

I	Preliminary Topics	7
1	Review of Linear Algebra	9
2	Polyhedron Analysis	11
II	Linear Programming	13
3	Introduction	15
4	Formulation Skills	17
5	The Simplex Method	19
6	Artificial Variable	21
7	Duality Theory	23
8	Sensitivity Analysis	25
9	Ellipsoid Algorithm	27
10	Projective Algorithm	29
11	Interior-Point Algorithm	31
12	Exercises	33
III	Graph and Network Theory	35
13	Introduction	37
14	Paths, Trees, and Cycles	39
15	Shortest-Path Problem	41
16	Minimum Spanning Tree Problem	43
17	Maximum Flow Problem	45
18	Minimum Cost Flow Problem	47
19	Assignment and Matching Problem	49
20	Exercises	51
IV	Integer and Combinatorial Programming	53
21	Introduction	55

22 Formulation Skills	57
23 Branch and Bound	59
24 Branch and Cut	61
25 Packing and Matching	63
26 Traveling Salesman Problem	65
27 Knapsack Problem	67
28 Exercises	69
 V Dynamic Programming	 71
29 Introduction	73
30 Exercises	75
 VI Nonlinear Programming	 77
31 Introduction	79
32 Exercises	81
 VII Heuristics and Meta-heuristics	 83
33 Introduction	85
34 Exercises	87
 VIII Computational Complexity	 89
35 Introduction	91
36 Exercises	93
 IX Game Theory	 95
37 Introduction	97
38 Exercises	99
 X Decision Analysis	 101
39 Introduction	103
40 Exercises	105
 XI Probability and Stochastic Processes	 107
41 Introduction	109
42 Exercises	111

XII	Markov Chains	113
43	Introduction	115
44	Discrete-Time Markov Chains	117
45	Continuous-Time Markov Chains	119
46	Exercises	121
XIII	Queuing Theory	123
47	Introduction	125
48	Queuing Model	127
49	Birth-Death Process and M/M/C/K	129
50	Phase-Type Queue	131
51	Bulk Queue	133
52	M/G/1 and G/M/1	135
53	Queuing Network	137
54	Exercises	139
XIV	Inventory Theory	141
55	Introduction	143
56	Exercises	145
XV	Reliability Theory	147
57	Introduction	149
58	Exercises	151
XVI	Bayesian Statistic	153
59	Introduction	155
60	Exercises	157
XVII	Classical Statistic	159
61	Introduction	161
62	Exercises	163
XVIII	Simulation	165
63	Introduction	167
64	Exercises	169

Part I

Preliminary Topics

Chapter 1

Review of Linear Algebra

Chapter 2

Polyhedron Analysis

Part II

Linear Programming

Chapter 3

Introduction

Chapter 4

Formulation Skills

Chapter 5

The Simplex Method

Chapter 6

Artificial Variable

Chapter 7

Duality Theory

Chapter 8

Sensitivity Analysis

Chapter 9

Ellipsoid Algorithm

Chapter 10

Projective Algorithm

Chapter 11

Interior-Point Algorithm

Chapter 12

Exercises

Part III

Graph and Network Theory

Chapter 13

Introduction

Chapter 14

Paths, Trees, and Cycles

Chapter 15

Shortest-Path Problem

Chapter 16

Minimum Spanning Tree Problem

Chapter 17

Maximum Flow Problem

Chapter 18

Minimum Cost Flow Problem

Chapter 19

Assignment and Matching Problem

Chapter 20

Exercises

Part IV

Integer and Combinatorial Programming

Chapter 21

Introduction

Chapter 22

Formulation Skills

Chapter 23

Branch and Bound

Chapter 24

Branch and Cut

Chapter 25

Packing and Matching

Chapter 26

Traveling Salesman Problem

Chapter 27

Knapsack Problem

Chapter 28

Exercises

Part V

Dynamic Programming

Chapter 29

Introduction

Chapter 30

Exercises

Part VI

Nonlinear Programming

Chapter 31

Introduction

Chapter 32

Exercises

Part VII

Heuristics and Meta-heuristics

Chapter 33

Introduction

Chapter 34

Exercises

Part VIII

Computational Complexity

Chapter 35

Introduction

Chapter 36

Exercises

Part IX

Game Theory

Chapter 37

Introduction

Chapter 38

Exercises

Part X

Decision Analysis

Chapter 39

Introduction

Chapter 40

Exercises

Part XI

Probability and Stochastic Processes

Chapter 41

Introduction

Chapter 42

Exercises

Part XII

Markov Chains

Chapter 43

Introduction

Chapter 44

Discrete-Time Markov Chains

Chapter 45

Continuous-Time Markov Chains

Chapter 46

Exercises

Part XIII

Queuing Theory

Chapter 47

Introduction

Chapter 48

Queuing Model

Chapter 49

Birth-Death Process and M/M/C/K

Chapter 50

Phase-Type Queue

Chapter 51

Bulk Queue

Chapter 52

$M/G/1$ and $G/M/1$

Chapter 53

Queuing Network

Chapter 54

Exercises

Part XIV

Inventory Theory

Chapter 55

Introduction

Chapter 56

Exercises

Part XV

Reliability Theory

Chapter 57

Introduction

Chapter 58

Exercises

Part XVI

Bayesian Statistic

Chapter 59

Introduction

Chapter 60

Exercises

Part XVII

Classical Statistic

Chapter 61

Introduction

Chapter 62

Exercises

Part XVIII

Simulation

Chapter 63

Introduction

Chapter 64

Exercises
